

Isobel Keating-Downey,

Local 183 Labourer, Union Station
Enhancement Project

Upon graduating high school, I worked various jobs in hopes that I would find the path that I was most passionate about – working both in the Health & Wellness space as well as pursuing post-secondary education in the Legal field. I quickly realized that I was not cut out for the office environment but enjoyed working with my hands and in the elements.

I secured employment working on a construction jobsite as a Traffic Controller, directing traffic for major construction projects around the city. It was not long before I was given an opportunity to work alongside the labourers on the Union Station Enhancement Project for Peter Kiewit Sons' Co.

I have been working in the Construction Industry as a proud member of Local 183 for over 4 years now and could not be happier with my decision to pursue a career in the Skilled Trades.

I plan to continue growing my career in the Skilled Trades and would encourage women looking for a lucrative, fulfilling career, to continue to take up space in the Construction industry.
